Mr. Miller,

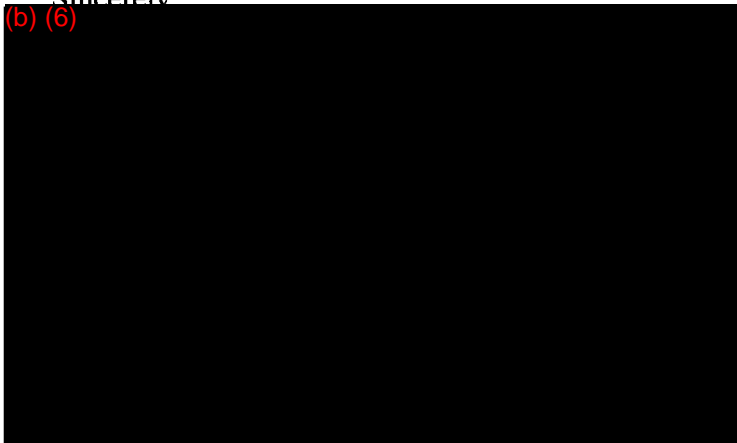

I am writing to you as a very concerned citizen in the Baytown, TX area. Currently our way of life as residents is threatened by the San Jacinto Waste Pits that have a temporary cap that is unsustainable. This means that waste will leak out in the near future and pollute our waters with dangerous and deadly dioxins.

I am aware of the different methods available in order to mitigate this crisis, but to me there is only one that makes sense. We must use a permanent cap. As previously stated, we do not have a lot of time left and we cannot afford to spend years addressing the issue. I worry that if we take too much time we could leave ourselves open to a potentially horrible disaster. Especially with the recent natural disasters that have occurred.

Please support a permanent cap. It is the best solution.

Sincerely,

(b) (6)
